Jasmohan Bajaj  
Department of Internal Medicine  
School of Medicine  
*Impaired brain-gut axis in the pathogenesis of Alzheimer’s dementia*

Paul Bukaveckas  
Center for Environmental Studies  
VCU Life Sciences  
*Algal toxins in the environment: Advancing the state of science through new analytical techniques and experimental approaches*

Karen Chartier  
School of Social Work  
*Strengthening African-American and Latino engagement in DNA research*

Hayley Cleary  
Criminal Justice Program  
L. Douglas Wilder School of Government and Public Affairs  
*Testing the general deterrent impact of adolescent sex offender registration policies*

Sean Cox  
Department of Mathematics and Applied Mathematics  
College of Humanities and Sciences  
*Open problems in the foundations of mathematics*

Sandro da Rocha  
Department of Pharmaceutics  
School of Pharmacy  
*Placental targeting for noninvasive fetal therapy*

Mary Lynn Davis-Ajami  
Department of Adult Health and Nursing Systems  
School of Nursing  
*Estimating the payer-specific excess costs of select infections in adults with diabetes and their relationship to oral antidiabetic medication non-adherence*

Sumitra Deb  
Department of Biochemistry and Molecular Biology  
School of Medicine  
*Targeting mutant p53 in lung cancer*

Swati Deb  
Department of Biochemistry and Molecular Biology  
School of Medicine  
*HDAC inhibitor augmentation to clozapine: A pilot study in schizophrenia*

Javier Gonzalez-Maeso  
Department of Physiology and Biophysics  
School of Medicine  
*Looking westward: Visual narratives of the American West in the U.S. Capitol*

Debra Hanson  
Department of Art History  
School of the Arts, VCU Qatar  
*Continued on next page*
Hisashi Harada
Department of Oral and Craniofacial Molecular Biology
School of Dentistry
A pilot gene therapy strategy for head and neck cancer treatment

Melissa Jamerson
Department of Clinical Laboratory Sciences
School of Allied Health Professions
Functional relevance of a signaling protein linked to attachment and invasion of Naegleria fowleri amebae

James Kang
Department of Pharmacology and Toxicology
School of Medicine

Maria Rivera
Department of Biology
College of Humanities and Sciences
Altered gastrointestinal microbiota in opioid-induced antinociceptive tolerance

Tomasz Kordula
Department of Biochemistry and Molecular Biology
School of Medicine
Yin Yang 1, a master regulator of chronic inflammation in glioblastoma multiforme

Pamela Lawton
Department of Art Education
School of the Arts
Artstories: A tale of two capital cities

Worth Longest
Department of Mechanical and Nuclear Engineering
School of Engineering

Rebecca Heise
Department of Biomedical Engineering
School of Engineering
Developing a practical delivery device and animal proof-of-concept data for a new inhaled surfactant therapy developed at VCU

Alenka Luzar
Department of Chemistry
College of Humanities and Sciences

Hooman Tafreshi
Department of Mechanical and Nuclear Engineering
School of Engineering
The physics of detaching a droplet from a fiber

Jessika Rojas Marin
Department of Mechanical and Nuclear Engineering
School of Engineering
Radiosensitizer nanomaterials for enhanced targeted radiation therapy

Stephen Tucker
Department of Teaching and Learning
School of Education
Investigating children’s mathematical interactions with a touchscreen technology environment

Weining Wang
Department of Mechanical and Nuclear Engineering
School of Engineering
Engineered photocatalysts with hierarchical structures toward better CO2 photoreduction efficiency

Marcia Winter
Department of Psychology
College of Humanities and Sciences

Robin Everhart
Department of Psychology
College of Humanities and Sciences
Families of Richmond, VA

Shijun Zhang
Department of Medicinal Chemistry
School of Pharmacy

Xiang-Yang Wang
Department of Human and Molecular Genetics
School of Medicine
Novel NLRP3 inflammasome inhibitors and multiple sclerosis
